SYMPATHETIC SOLUTIONS TO CLASSIC ISSUES...

TSR TITANIUM SPINDLES/AXLES (Honda CB500 94-03)

Front wheel spindle £95 • Rear wheel spindle £115

Swing arm spindle £115 • Set of 3 titanium spindles £300

All prices include VAT • Free delivery for orders over £150

CB500s have a relatively low power output, so weight is everything! And reductions in un-sprung weight (as offered by our wheel spindles) offer the greatest benefit. Most original spindles are now in fairly poor condition and replacements are, for the most part, unavailable.

TS Retrofit spindles are high-quality items that are CNC machined by us here in the UK.

Our CB500 titanium spindles are 43% lighter than the stock items, they are a direct replacement for the original Honda parts, and as titanium is highly corrosion resistant (it is similar to stainless steel in that respect), these spindles should last a lifetime.

Be sure to also check out our CB500 titanium engine mounts – they are ideal replacements for corroded or damaged mounts, they will save even more weight, and they look great too!

Orders, payment & delivery/collection: If you want to place an order, drop us an email and we'll take it from there. Payment is by bank transfer (preferred) or Paypal. Royal Mail 48 Tracked delivery is free for orders over £150. For smaller orders, it's £7.50. You can collect by prior appointment if you prefer – we are near Maidstone in Kent.

Important: While our products can be successfully installed by any competent/experienced home mechanic, we strongly recommend that you get your installation checked by a suitably qualified & experienced motorcycle technician. **If you would like your kit professionally installed**, we offer a fitting service at our workshop in Kent (contact us for details).
