SYMPATHETIC SOLUTIONS TO CLASSIC ISSUES...

TSR LIGHTWEIGHT ENGINE MOUNTS & SPACERS (Honda CB500 94-03)
Set of 3 mounts complete with 4 spacers £100 including VAT

CB500s have a relatively low power output, so weight is everything! Our CB500 engine mount set is 55% lighter than stock, and much lighter than anything else that's available.
TS Retro engine mounts are high-quality items; CNC machined here in the UK. The studs are titanium, the waisted spacers are aluminium alloy (lighter than titanium), and the 3 nuts are bright zinc plated steel (titanium nuts save virtually no weight at all but add significantly to the cost).
Be sure to also check out our CB500 titanium wheel & swing arm axles – they are ideal replacements for corroded or damaged items, they will save even more weight, and they look great too!

Orders, payment & delivery/collection: If you want to place an order, drop us an email and we'll take it from there. Payment is by bank transfer (preferred) or Paypal. Royal Mail 48 Tracked delivery is free for orders over £150. For smaller orders, it's £7.50. You can collect by prior appointment if you prefer – we are near Maidstone in Kent.

Important: While our products can be successfully installed by any competent/experienced home mechanic, we strongly recommend that you get your installation checked by a suitably qualified & experienced motorcycle technician. **If you would like your kit professionally installed**, we offer a fitting service at our workshop in Kent (contact us for details).
